Richform Holdings Limited

Maximize the SME advantage in promoting smoke-free culture

As a distributor of drinking water systems and related products, Richform Holdings Limited has shown an obligation beyond promoting quality drinking water. In a bid to advocate fresh air and healthy lifestyle, a smoke-free taskforce spearheaded by Jimmy Lau, Chief Executive Officer, has been set up to establish and develop a sustainable smoke-free strategy for the company. He remarked that the staff could realize the company's focus and determination against tobacco by driving smoke-free initiatives from the management. The efficiency of designing and executing smoke-free policies will also be enhanced. To encourage more staff to quit smoking, the group allows staff to join cessation talks during working hours. Other measures like promotional emails and cash prizes are also in place to motivate them to put down the cigarettes. In addition, the group promotes a smoke-free lifestyle to its clients and subscribers through newsletters and the corporate website. Jimmy Lau believes every SME's effort in advocating smoke-free culture counts.
